

Server Requirement

 microelephant.io/prowriters/server-requirements

The application is built with Laravel Framework 7.11.0. You will need to make sure your server meets the following requirements:

- PHP >= 7.2.5
- BCMath PHP Extension
- Ctype PHP Extension
- Fileinfo PHP extension
- JSON PHP Extension
- Mbstring PHP Extension
- OpenSSL PHP Extension
- PDO PHP Extension
- Tokenizer PHP Extension
- XML PHP Extension

Directory Permissions

After uploading the files, you will need to configure some permissions. Directories within the **storage** and the **bootstrap/cache** directories should be writable by your web server or the application will not run.

Most folders should be normal: "755" and files: "644". Laravel requires some folders to be writable for the web server user. You can use this command on unix based OSs.

```
sudo chgrp -R www-data storage bootstrap/cache
```

```
sudo chmod -R ug+rw storage bootstrap/cache
```

Symbolic link

Your server should allow creating Symbolic link
